Paperback More Buying Choices \$4.30 (11 used offers) Go back to filtering menu Tell us how we can improve. If you need help, please. Astronomers Without Borders | Celestron - Telescopes ... Global Astronomy Month (GAM), coordinated each April by Astronomers Without Borders, is the world's largest annual celebration of astronomy. With dozens of programs ranging from webcasts to contests, AWB and its partners bring new ideas and special editions of existing programs to the GAM worldwide stage. How to Choose A Telescope for Astronomy | Types of Telescopes A refractor is the stereotype of how a telescope is supposed to look – a long, gleaming tube with a large lens in front and an eyepiece at the back. The front lens (the objective) focuses light to form an image in the back. The eyepiece is a little magnifying glass with which you look at the image.

Instruction Manual - Tilbury Hill Observatory 800 million miles. Focus beyond the Solar System and observe majestic nebulae, ancient star clusters, remote galaxies, and even stars recently discovered to have planets orbiting about them. Meade ETX telescopes are instruments fully capable of growing with your interest and are ideal for both the casual observer and serious astronomer alike.
